

the proposal for the milestone project

separtate pages based on same "template" across the pages

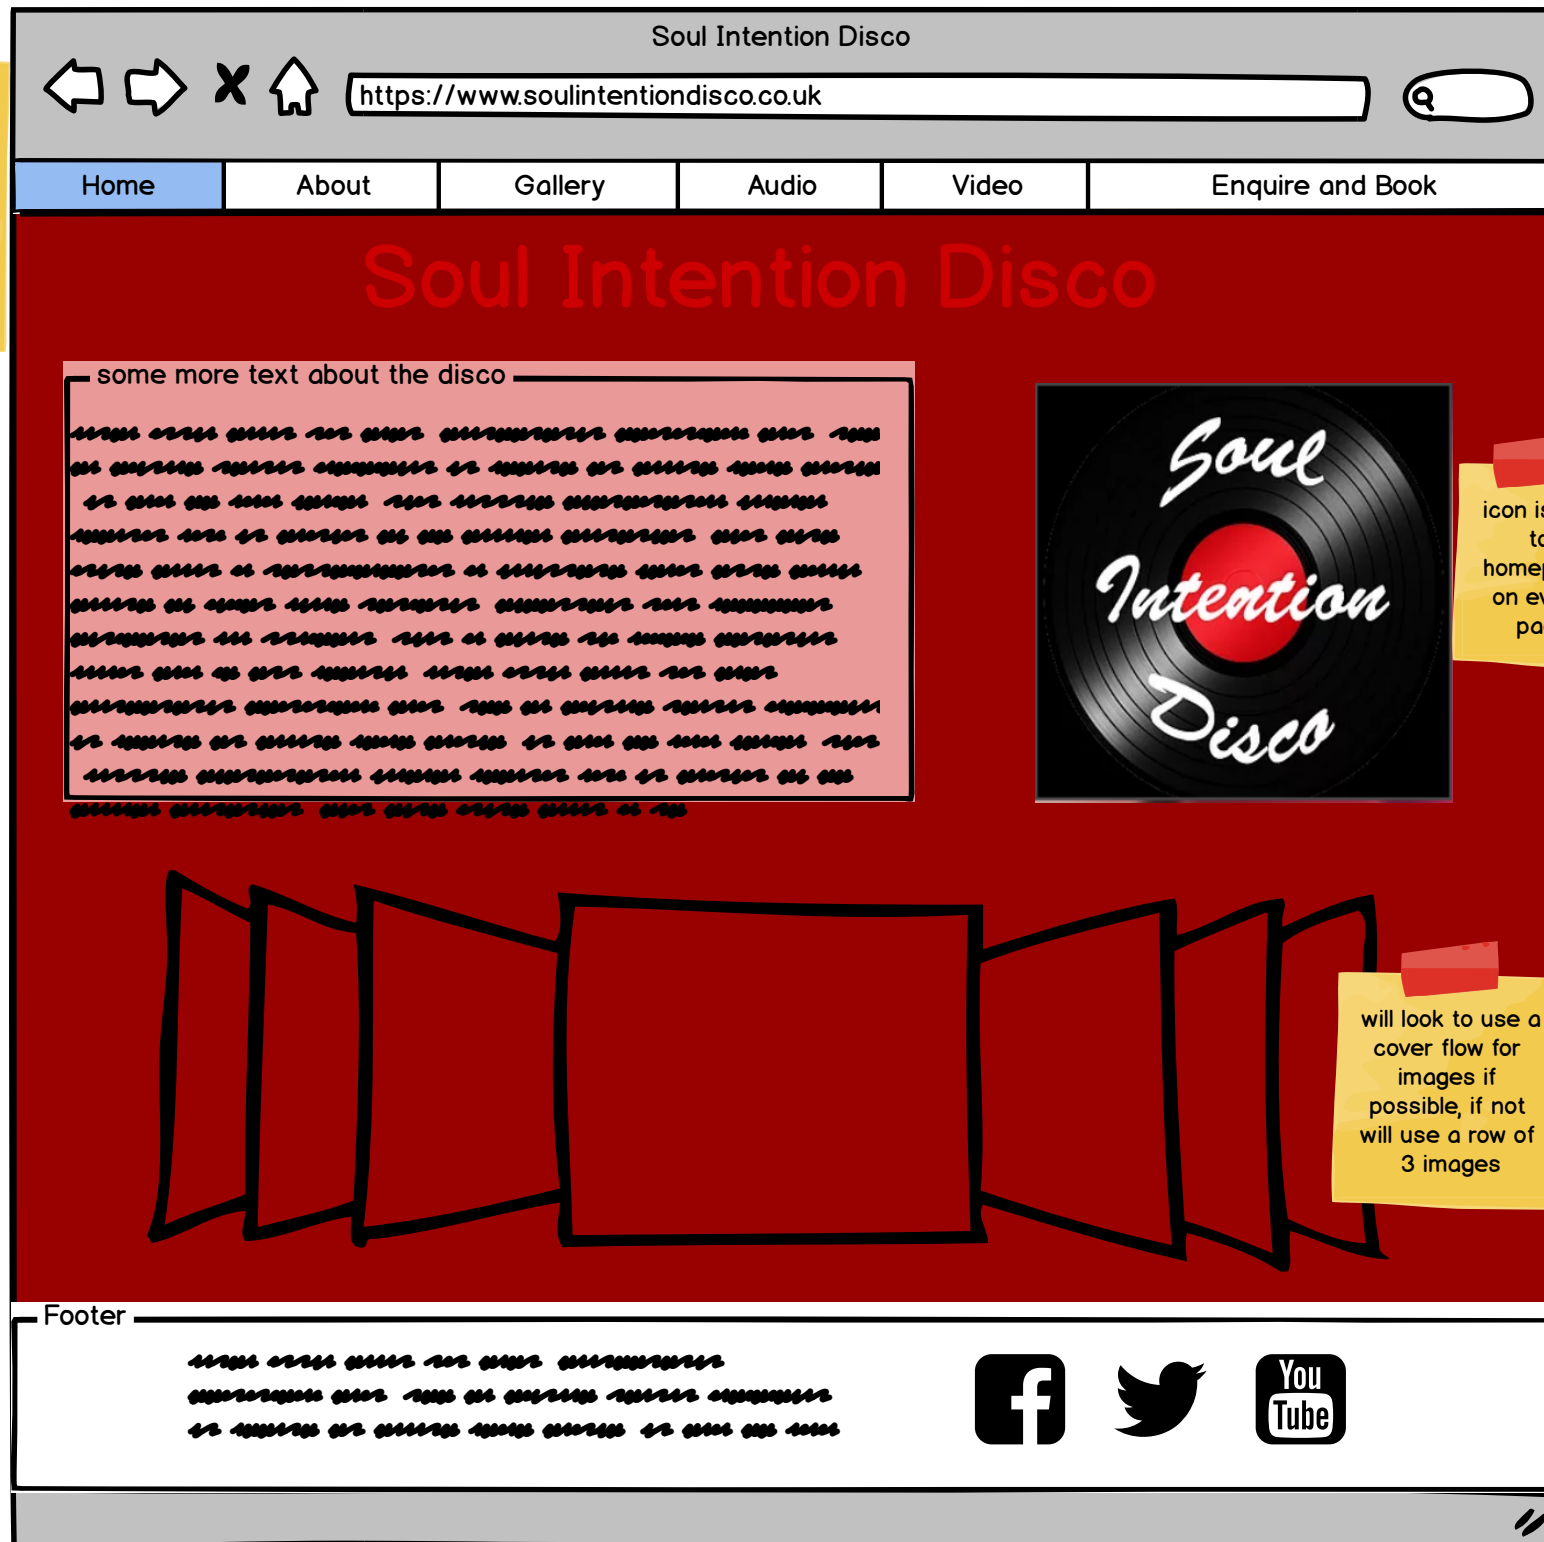

enquiries and booking will be basic forms at present are features that will added to later, but not as part of the initial milestone project, as can other extension pages such a links to other soul sites by offering a drop down menu

should i look to use font awesome icons where possible? as per whiskey drop project?

enquiries and booking will be basic forms at present are features that will added to later, but not as part of the initial milestone project, as can other extension pages such a links to other soul sites by offering a drop down menu

should these sections be split in a grid fashion? for example 2/3 and 1/3 ?

should i look to use icons where possible? as per whiskey drop project?

need a audio clip player here for at least 3 tracks

can add some more text here about the dj / equipment / genres / areas covered etc etc

basic enquiry section ? to confirm should this be part of the milestone project brief?
